

FOCUSED ON YOU. FOCUSED ON LIVING BETTER.

OCH Rehab Services Occupational Therapist Jamie Yates is focused on helping Alex Daly live better. After years of trying out prosthetic arms that Alex said “hindered more than helped,” he found the right fit with Jamie. With nearly 20 years of experience, Jamie has received specialized training to help patients learn how to use a myoelectric prosthesis. Through one-on-one, individualized therapy sessions, Jamie is able to help Alex strengthen his muscles to carry the weight of the prosthesis and teach him new grips to help with daily tasks and even play his guitar. Whatever your goal is, the OCH Rehab Services team is focused on helping you live better!
