

Bulging, Herniated or Worn Discs may be to Blame for Sciatica, Pain and Numbness in Legs

Did you know that over 30 million North Americans suffer from back and neck pain every day? Whether spine and back problems result from an auto accident, injury, or have crept up over time, sciatica and herniated discs are often misunderstood and improperly treated. They can result in pain and numbness anywhere in the body. This pain affects everything that you do, from work to play, and ultimately your quality of life. You might not even be able to sleep at night without pain. If you suffer from debilitating pain, we are here to tell you that there is hope. We have the technology and decades of experience to help you find relief from disc problems and sciatica. The Spinal Decompression Institute focuses on treating all disc and spine-related conditions with advanced non-surgical treatments. We are so confident that we can help you find relief that we are offering a complimentary consultation to the first 25 callers.

Spinal Decompression Allows Back Pain to Heal...Without Drugs or Surgery

Decompression relieves pressure that builds up on the discs and nerves. The task of relieving pain comes about as a result of drawing the leaking gel of a herniated disc

Example images: In the before picture you can see the herniated disc (black) protruding into the spinal column (white, center of MRI). After decompression treatment, the MRI shows the herniated disc is no longer bulging into the spinal canal where the spinal nerves are located.

back into place. Decompression achieves this by creating negative pressure within the disc, referred to as negative intradiscal pressure. This essentially creates a vacuum to draw the bulging and herniated disc material back into the disc space and relieves pressure. Spinal Decompression Institute has over 10 years of experience using non-surgical decompression and other effective treatments, to help the body naturally heal itself.

Class IV Therapeutic Laser

The Spinal Decompression Institute employs a variety of high-tech solutions along with decades of experience to help alleviate your particular pain. Along with spinal decompression, our Class IV Therapeutic Laser Therapy is an outpatient, nonsurgical procedure which is often used in sports medicine to accelerate the healing process. This pain-free, non-surgical approach works by stimulating the body's natural healing processes, providing pain relief and reducing injury and damage. This leading-edge technology has been shown to be effective in helping patients to return to work, sports and the everyday activities of life they enjoy. Laser therapy is just one of the treatment options that Spinal Decompression Institute offers as a non-invasive alternative to surgery.

Who is a Candidate for Spinal Decompression?

7 out of 10 people experience low back and neck pain at some point in their lives. These types of pain are the most common reasons for patient visits to primary care physi-

If your pain is the result of a motor vehicle accident, we will work with ICBC or attorney on your behalf.

cians and hospitals. Back and neck pain exists in epidemic proportions today.

Many spinal conditions can be treated, including pain due to bulging and herniated discs, degenerated discs, sciatica, low back pain, and neck pain. If you have chronic or severe back pain, you may be a candidate for spinal decompression treatment. At the Spinal Decompression Institute, we will evaluate your condition and only recommend treatment if it's right for you.

Why The Spinal Decompression Institute?

The staff at the Spinal Decompression Institute has over 40 years of combined experience in treating patients suffering from back and neck problems. We offer a variety of treatment options for those dealing with back pain. We have helped thousands of people to live pain free!

Live Pain Free

We will personally evaluate your condition and determine if our program will help you. It's that simple! There are no strings attached and you have no obligation. Due to demand, we have opened our schedule to the first 25 callers only. Time slots fill quickly so call today to secure your consultation/evaluation.

No Risk, Free Consultation

If you suffer from sciatica, or severe back or neck pain, you may find relief! If you are serious about getting your life back and eliminating your back and neck pain, we are serious about showing you how technology and experience may help. Due to demand, we are extending this offer for a FREE consultation to the first 25 callers with no obligation. These spaces fill up quickly, so call today to book your appointment. CALL TODAY!

SPACE IS LIMITED TO THE FIRST 25 CALLERS. CALL TODAY TO SCHEDULE YOUR FREE CONSULTATION!
