

## **Mechanical Design Engineer**

Placepower design and manufacture test equipment and factory automation for many industries around the world including the electronics, medical and automotive sectors.

The successful applicant will be designing jigs, fixtures and tooling for hand assembly, semi-automatic machines for low volume, through to assembly systems for mass production. You will be responsible for concept design, assembly drawings and detail drawings through to compiling parts lists and manuals. The successful applicant will be qualified to ONC level, possess excellent design skills and be proficient with AutoCAD 2D and Inventor 3D design software along with Word and Excel. Experience in industry is essential, along with flexibility, enthusiasm and the ability to work on your own initiative.
