

## Good News for NERVE PAIN & NEUROPATHY SUFFERERS!

EXPERIENCE RELIEF FROM NAGGING BACK OR LEG & ARM PAIN WITHOUT DRUGS OR SURGERY!!

COMPUTER AIDED DECOMPRESSION, LASER THERAPY AND VIBRATION THERAPY HAVE EMERGED AS A NON-INVASIVE, NON-DRUG SOLUTION FOR YOUR NEUROPATHY PAIN, NUMBNESS, OR TINGLING!

**ARE YOU IN PAIN? HAVE YOU BEEN DIAGNOSED WITH A HERNIATED OR BULGING DISC, NEUROPATHY, NERVE PAIN, PINCHED NERVE OR SCIATICA? HAVE YOU TRIED EVERYTHING TO ALLEVIATE YOUR PAIN WITHOUT SUCCESS?**

Tried everything for your pain, numbness or tingling with minimal or only temporary relief? Tired of taking medications that cause all kinds of side effects and aren't actually fixing the problem? Doctor told you they can't help. If you answered yes to some or all of these questions we want you to know you are not alone. Thousands of people are in the same situation. Many of them have found affordable, effective, permanent relief.

### Testimonial

I am writing this testimonial for Dr. Paul Mutti in hopes that someone else may experience the life changing abilities that he may provide. I am speaking of my own personal experience. I have had back pain for years. Medical doctors prescribed pain medication that continued to get stronger and caused increasing side effects. Other treatments from other chiropractors and therapists would sometimes help briefly but never lasted very long. In the month before my first visit with Dr. Paul I was unable to function without pain meds on a daily basis and even then I was weak and at best uncomfortable. My first visit I used the elevator for the trip up one level at the clinic. After a few weeks I now am back to taking the stairs two at a time. I take no prescribed pain meds, I feel well, I think clearly. My quality of life has gone from miserable to enjoyable, I feel years younger and can act like it. Dr. Paul will assess your specific case and advise you if he can help or not. I could go on with many more examples and praise but I am not here to convert you, I am offering the real results that Dr. Paul and his associates have given me.

Bill

P.S. a footnote from my wife:

I wanted to add a brief note to Bill's experience with Dr. Paul. When we read the ad, he hemmed and hawed about making an appointment - but I told him - you have to try something, you have to keep trying - you can't live like this, in pain and tired all the time. It's affecting you and it's affecting me!"

So he made the appointment - on his return from the very first appointment - when I saw him walking - I exclaimed "Wow, I haven't see you walk that tall and with purpose in a long time!"

And it stayed like that - he never slid backward - just kept getting better.

I don't often make recommendations, because everyone seems to have a different experience - but if he can do for you, even half of what he's done for Bill - it will be well worth your time to give it a try.

Eva

### THERE IS HELP!

Patients report relief of symptoms such as:

- Herniated/Bulging Discs
- Chronic Lower Back or Neck Pain
- Sciatica-shooting pain down leg
- Throbbing/Burning in hands and feet
- Numbness, Tingling or Weakness
- Peripheral Neuropathy

### WHAT IS NEUROPATHY AND WHAT ARE THE SYMPTOMS?

Neuropathy is nerve damage that occurs in the nerves of the arms/hands or in the legs/feet. Symptoms include pain, numbness, burning, tingling and weakness to name a few.

It is important to have a thorough examination to determine your individual cause for your neuropathy symptoms. Your treatment will be specific for your individual cause.

### HOW NERVE PAIN HAS BEEN TREATED IN THE PAST. ARE DRUGS AND SHOTS THE ANSWER?

Until now, people have masked their pain by frequently taking prescription pain pills. This type of relief masks the cause, is temporary, and more often can lead to even more pain or worse yet, addiction to drugs and side effects. Many people innocently fall into abusing prescription pain pills while initially using them to alleviate pain. With all the potential side effects are pain pills really the best long term solution to pain?

### HOW PAIN IS NOW BEING TREATED

Until now, drugs and surgery were the ONLY options for nerve pain, numbness and tingling. Today we have emerged as a non-invasive, non-drug solution for your nerve pain, numbness and tingling! Not all patients will need Spinal Decompression, Vibration Therapy, Laser Therapy some patients may qualify for one or two of the therapy's listed above some may qualify for all of the above therapy. A complimentary consultation will determine your qualification.

### SPINAL DECOMPRESSION TAKE THE PRESSURE OFF THE NERVES

Spinal Decompression helps to reduce disc bulges and disc herniations in order to take the pressure off of the nerves being irritated. Spinal Decompression is a revolutionary, computer aided technology that treats the symptoms of Disc Herniations, Disc Degeneration, Sciatica, low back and neck pain. Decompression works by retracting (sucking in) the disc herniation and allowing the damaged disc to heal. Spinal decompression even helps degenerated discs. This process takes the pressure off nerves and helps them to heal.
