

# May is... Better Hearing and Speech Month

Better Hearing & Speech Month (BHSM):  
an opportunity to raise awareness about  
communication disorders.

## Did You Know?

- ◆ 48 million Americans are suffering from some degree of hearing loss.
- ◆ Your hearing is dependant on the tiny hairs deep inside your ears. If you damage those hairs, you can permanently damage and lose your hearing.
- ◆ Ears not only help you hear, they also help you keep your balance.

### Make Sure Your Hearing is in Tip-Top Shape!

- ◆ FREE Hearing Screening
- ◆ FREE Hearing Consultation
- ◆ FREE Hearing Aid Clean & Check

Your Hearing  
Aid Order**

expires: 6/30/19

## What You Can Do:

### Educate Yourself

Learn how hearing loss develops and how it can impact lives around you. Talk to your loved ones about hearing loss, understand their concerns and discuss solutions to overcome reservations.

### Get Hearing Protection

If you work in a noisy environment make sure to use personal protective equipment such as earmuffs or headphones. Remember to use discretion when attending events such as a concert or fireworks display. Exposure to noise louder than 85 decibels can cause permanent hearing loss.

### Schedule a Hearing Exam

It's important to get your hearing checked regularly – just like an eye exam or a teeth cleaning. Hearing loss occurs gradually, you won't always notice the sounds you are missing. Call **815-758-0157** to schedule your free hearing exam today!
