

Have You Heard?

Presented by **Dr. Janet Westlund**
Board Certified Audiologist

THE 24/7 HEARING INSTRUMENT

Hearing-impaired people with active lifestyles want a hearing instrument that will not inhibit activity or get in the way of sports performance. With these and other factors in mind, there is a hearing instrument that is not only 100% invisible, but it is also the world's first 24/7 hearing instrument. Moreover, with no need to change a battery, this hearing instrument can be worn and replaced every four months. In the meantime, the 24/7 hearing instrument utilizes the ear's natural sound-gathering ability to direct incoming sounds to its position deep in the ear canal, next to the eardrum. While not "waterproof," the 24/7 hearing instrument is sufficiently "water-resistant" to be worn while exercising, showering, talking on the

phone, and sleeping.

Keeping pace with the fast-growing technology of today's hearing industry is an integral part of our business. As an Audigy Certified Practice, the only provider in this area to hold this distinction, we adhere to a strict set of AGX certified patient care standards that deliver unsurpassed patient satisfaction. Our AGX Protection Plan offers a 75-day trial period on all new hearing aid purchases. In addition, we provide a 3-year free battery program and complimentary quarterly cleanings and checkups for your hearing system.

P.S. The 24/7 hearing instrument is designed for people with mild to moderately-severe hearing
