

How many more floods will it take?

Every year, thousands of Canadians pay the emotional and financial costs associated with flooding. When our homes are at risk, our financial security is too.

Canada needs continued federal leadership to create a cohesive [National Action Plan on Flooding](#) that:

- ✓ Moves people out of harm's way
- ✓ Educates Canadians about flood risk
- ✓ Invests in flood defences
- ✓ Provides all Canadians with access to affordable insurance
- ✓ Ends building on flood plains

Flooding now costs Canadians more than any other climate issue. Ask the candidates in your riding if their party's election platform includes a flood action plan. If it doesn't, it's not relevant to Canada.
