

Who Wants His Sciatica Gone By Labour Day?

Dateline: Windsor- For the last fifteen years Windsor has been home to a secret that until recently only a few hundred people have known about. A local doctor, Dr. Craig Schisler of the Schisler Spine Centre has been developing a proprietary program called **The Sciatica Solution™**.

“Patients have been coming to me with extreme sciatica pain- pain in the low back and down one or both legs- and many of those have been getting relief in as little as a few visits,” says Dr. Schisler.

Dr Schisler explains Sciatica is caused by an irritation of the sciatic nerve- a long, thick nerve running from your back down the back of your legs. When the nerve gets compressed by a disc bulge the pain can literally bring you to your knees.

With **The Sciatica Solution™** there is now new treatment right here in Windsor that can possibly get rid of your back or sciatica pain for good, all without surgery.

The program uses a unique non-invasive

technique proven to reduce the size of bulging discs and take pressure off the sciatic nerve.

Good News: Dr. Schisler is offering a free consult for the first 7 people to respond to this article. If you are suffering with severe back or sciatica pain and would like to see if you qualify for **The Sciatica Solution™** program call **519-988-0220** **right now** or go to www.windsorspineandlaser.com and book your appointment. Limited Space Available. Insurances accepted.
