

BREAKTHROUGH IN BACK PAIN RELIEF

How Patients Eliminate Back Pain Without Surgery

Are you in pain? Have you tried everything and you are possibly contemplating surgery? If you are sick and tired of suffering with your nagging back or neck pain, then it is time to throw aside your pain pill bottles and begin to get rid of the cause of your problem. We have seen hundreds of patients who received operations they did not need and are still in pain but DRX9000 Nonsurgical Spinal Decompression is proven to be a safe and effective alternative to surgery.

Are there any side effects or associated risk?

During more than twenty years of use by healthcare providers all over the world, very few side effects have ever been reported. Occasionally some old injuries or pain syndromes may feel aggravated for a few days, as the healing response is more active after treatment.

How long before the results are felt?

You may feel improvement in your condition (usually pain reduction) after the very first treatment. Sometimes you will not feel improvement for a number of treatments. This does NOT mean that nothing is happening. Each treatment is cumulative and results are often felt after 3 or 4 sessions. Other healing modalities can be used with spinal decompression protocol to increase the effectiveness of the treatment.

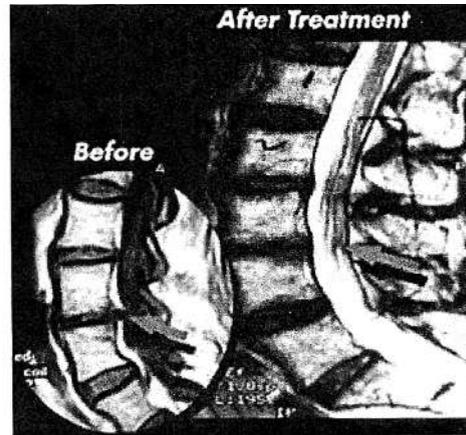

The DRX9000 is quickly becoming the treatment of choice for herniated and bulging discs, sciatica, facet syndrome, failed back surgery and degenerative disc disease.

"This technology works by creating a vacuum." Says Dr. Le, the first doctor in Stockton to utilize the DRX9000 system. "The vacuum effect repositions the disc and allows nutrients, oxygen and water to re-enter the disc. That's what makes this a lasting treatment."

Clinical results of a pilot study presented at the 18th Annual Clinical Meeting of the American Academy of Pain Management in September 2007 were amazing. After two weeks of treatment on the DRX9000 there was a 50% reduction in pain scores and upon completion of the entire six weeks protocol an amazing success rate of 88.9% was documented. Treatment for the patient is extremely comfortable and most patients fall asleep during their 20-80-minute treatment session. In many cases, the pain resolves after the first few minutes of being on the machine.

This treatment is cleared by the FDA for safety and efficacy. "Thanks to this technology, I am able to offer people a lasting solution without any of the risk of surgery," explained Dr. Le.

- It is all-natural. This means that you don't have to worry about any dangerous side effects. Pain medication and shots are not only temporary, but they also can have damaging effects on the stomach lining, liver and kidneys.
- Your treatment for long term relief will not take long at all. With the computer technology of this machine, you will actually see how you are progressing, so you will never receive more treatments than you need! And in many cases the results are long term and not temporary.

Call Our Friendly Staff Now If:

- ✓ You have been diagnosed with a herniated, bulging or slipped disc.
 - ✓ You've been told that you need back surgery.
 - ✓ Your back is stiff as a board.

- You must call 209-952-1883 and schedule a \$47.00 consultation for an appointment by March 30th to qualify.

"I came to Dr. Le for help. I am a teacher and for 5 weeks I could not stand up straight, or walk. A co-worker gave me his information, so I made an appointment. I started my treatments with Dr. Le. Well, my results were great. For the first time in 3 months I finally went to the gym,. I did 45 minutes of water aerobic and 50 laps of slow swimming. In the end I did not have any pain on my lower back, my aerobic coach said WOW! I haven't seen you in months. I responded to Dr. Le's treatment advice and now I am walking better and knowing that I can avoid back surgery. I gave him two thumbs up. I am back, I will recommended Dr. Le to anyone who is having a hard time with their spine pain. Thank you Dr. Le."

-Barbara Alvarez, Stockton CA

"I had Chronic leg pain and saw an advertisement for treatment of sciatica. I decide to give it a try. I trusted Dr. Le because my mother (94) had bad knee pain and was treated by Dr. Le. Its been over a 1 year and still no pain in her knee. I had nothing to lose but the pain. Laser treatment worked, Dr. Le is a miracle worker. Thank you Dr. Le also the staff is very accommodating and friendly. Overall Experience = A+"

-Karen Child, Manteca CA

"Dr. Le's pain relief program really worked and I was very happy with result, no more low back pain, from barely able to walk and no problem. The girls, the staff of Dr. Le are great and will take good care of you, no doubt. I felt relief within the first week of care. Dr. Le was great and he really care and very personable. The office of Stockton Spine Center is very clean and welcoming and the best, well equipped advanced state-of-the-art technology. Everything to rid of your pain is here in this office without any drugs, injections or surgeries. I highly recommend Stockton Spine Center of Dr. Le's."

-Lavinia Jimenez, Stockton, CA
