

Season's Greetings from Tradewind Energy

DeWitt County Neighbors:

I am thankful this holiday season for the warmth, hospitality and support the DeWitt County community has shown me and Tradewind Energy throughout 2017. Developing the Alta Farms II wind farm here has been a pleasure. I look forward to progressing toward construction in 2019 in partnership with our more than 200 landowners and the Clinton area community.

Northern DeWitt County is a great location for a wind farm; one of the best I've seen in Illinois.

First, it is windy and relatively flat with few water features, trees, or other natural areas that would attract wildlife.

Second, this area has a low rural population density making it easier to locate turbines in areas that will minimize impacts to residents.

Third, it has three transmission lines running north and east available to bring electricity to Chicago and points east.

Fourth, DeWitt County is an Illinois energy leader. Residents here understand how important homegrown, carbon free energy is to the economy and the environment.

Finally, the obvious interest in a wind farm from the vast majority of residents is exciting and refreshing. People see it as DeWitt County's turn; having watched neighboring communities benefit for many years from wind farms.

I'd like to extend an open invitation for anyone to stop by our office in the Magill building at 705 N Side Square in Clinton for a cup of coffee and hear the latest news on the project. We are always happy to provide you facts, accurate information and answer all your questions. If you can't stop by, please call or email me.

Thanks again and Happy Holidays to all our new friends and supporters in DeWitt County. Great things are in the works at the Alta Farms II wind farm. With your continued help and support, we can be under construction in about 18 months.

Sincerely,
Tom Swierczewski
