CLIENT RESULTS

I Can Get Out Of My Wheelchair

Richard K.

I have been wheelchair-bound since 2006. After one week of treatment I CAN get out of my wheelchair to my walker by myself, something I have not been able to do for years. I am also sleeping like there is no tomorrow. I can't wait to see what the future treatments bring.

Huge Reduction in Pain Medications

David A.

I have gone from taking 900 mg of Gabapentin to 300 mg a day within 3 weeks of treatment. Also, the pain and tingling in my feet and legs is gone.

*87% reduction in symptoms is based on an April 2012 published medical study. Offices following these protocols have seen similar results. Results may vary depending on age, condition, treatment compliance, genetics, diagnosis and other factors. Not all patients are candidates for treatment or are accepted for care. This program is not intended to diagnose, treat, cure, or prevent any specific disease. We are working to help relieve the symptoms of neuropathy and other types of inflammatory neuropathic pain conditions.

SAVE THIS AD. IT COULD CHANGE YOUR LIFE!
