"I love grandpa's new ears!"

"The turning point for me was when one of the kids told my wife that they didn't think I cared about them anymore.

She said I just don't listen to her, and that she thinks that I don't want to play with her.

That's when I realized that I didn't want to put this off any longer." M. Jones

Miracle-Ear®

Try Before You Buy!

*Studies conducted at the University of Northern Colorado (2014) and Oldenburg Horzentrums (2013) showed that Speech Reception Thresholds (SRT) in cocktail-party situations improved up to 35 dB loss for wearers with mild to moderate hearing loss using GENIUS with Directional Focus, compared to people with normal hearing. This corresponds to over 25% improvement in speech understanding. †Our hearing test is always free. Hearing test is an audiometric test to determine proper amplification needs only. These are not medical exams or diagnoses nor are they intended to replace a physician's care. ** Risk free trial, the aids must be returned within 30 days of delivery if not completely satisfied and 100% of the purchase price will be refunded.
