

My mother Effie A. has been a patient of Madison Health & Rehabilitation since this year. My mother and our entire family are very pleased with the care she is receiving from all the staff members.

The caregivers are exceptional, gentle, and loving. They treat the patients' as extended family and love them as such. Turnover of employees is much lower so caregivers get to know each patient very well. Staff is knowledgeable, which is another plus. All likes and dislikes are addressed instantly. They give exceptional personalized care to each patient in their unique way.

Placing a loved one in a nursing home is never an easy decision. I cannot imagine a better place for an aging parent that is close to home.
