

# WANTED

## 107 PEOPLE with HEARING LOSS

Qualified Participants Needed for Technology Field Test

The selection process for this test period will end **JULY 20<sup>th</sup>, 2018.**

During this limited-time event we are looking for people like you who may be experiencing varying levels of hearing loss, including ringing in the ears, to evaluate a remarkable new line of digital hearing instruments that could be the solution to your difficulties.

Call us toll free today to see if you qualify for this Field Test. Potential candidates will receive a FREE hearing screening\* (including Video Otoscopy)\* to determine candidacy.

Participants will receive a FREE in-office demonstration and the opportunity to evaluate the latest technology for 30 days at drastically reduced rates. A refund\*\* is available at the end of the test period if you feel your test instruments do not improve your hearing.

A full range of sizes are available in this new technology, including the **Invisible-In-Canal (IIC)** featured here with breakthrough **HD Speech Focus Processing™** technology.

### Think hearing aids should be heard, not seen?

The new Invisible-In-Canal hearing aids might just be your answer. This 100% custom, invisible-when-worn hearing aid is designed with the breakthrough HD Speech Focus Processing™ technology that is so fast, it analyzes incoming sound 20,000 times a second, eliminating feedback and quieting background noise so speech can come through more clearly. You get all the features and benefits you want in a digital hearing aid - without anyone knowing you are wearing one.

*What our patients are saying...*

"Being able to hear again gave me my life back. I no longer feel afraid to join in conversation. I feel more confident and laugh at all the things I never heard before. I would recommend hearing aids to anyone that has a hearing problem. Believe me, you do not know what you are missing."

*- Brenda S. (Litchfield, OH)*

\*For the purpose of fitting a hearing aid, the following procedures constitute a "Hearing Screening": Tests of threshold, pure tone air and bone conduction; Tests of tolerance, most comfortable listening level (MCL) and uncomfortable listening level (UCL); Tests of speech awareness and reception (SRT) and speech understanding or discrimination (WDS). Video otoscopy is used for the purpose of inspecting the ear canal.

\*\*Full refund of security deposit. Depending on level of customization necessary, fitting/restocking fees may still apply. Benefits of hearing instruments vary by type and degree of hearing loss, noise in the environment, accuracy of hearing test, and proper fit.
