

Horse Liniment Eases Arthritis Pain

Ocala, FL -- An ingredient derived from hot peppers that decreases inflammation in racehorse's legs, is now recognized as safe and effective for human use. The ingredient has been formulated into a product called ARTH-Rx[®] and comes in a strength designed for humans.

ARTH-Rx is a breakthrough in the treatment of painful disorders ranging from minor aches and pains to more serious conditions such as arthritis, bursitis, rheumatism and tendonitis. Some have also reported incredible relief from the pain associated with fibromyalgia.

Although the mechanism by which ARTH-Rx works to relieve pain is not totally clear, scientists suggest pain is relieved by intercepting the messenger substance that sends pain signals to the brain.

Available in a convenient roll-on applicator without a prescription. Supplies are sometimes limited. © 2018 HCD
