One in 20 Americans over the age of 50 has peripheral artery disease (PAD), a condition that develops when fatty deposits limit blood flow to the legs and increase the risk for a heart attack or stroke. Learn about possible symptoms you can experience, steps you can take to reduce your risk and treatment options.

Speaker: Naji Peyman, M.D., Cardiologist

Date & Time:
Wednesday, Dec. 5
5:30 p.m.-7:30 p.m.

RSVP by calling (844) 856-1499
